

Emile Henry Products

100% Natural

Working To Be Green

- Burgundy clay and the other non-clay ingredients are 100% natural and are biodegradable.
- There is no lead or cadmium in Emile Henry glazes, and all glazes meet CA Prop 65 requirements.
- All packaging is recyclable and made from recycled materials.
- Old plaster molds and all damaged products are recycled through cement factories.
- All water that is used for finishing and deglazing is recycled through a closed system inside the factory.
- All gases from our kilns are thoroughly filtered before release into the environment.
- All Emile Henry products are manufactured in Marcigny, France.

"It's important to work hard to preserve nature and control our impact on the environment."

Jacques Henry, President & Owner of Emile Henry
